Projects

NewMixer

CREATOR

Dec. 2018 - PRESENT

- A unique digital audio workstation designed to break away from the traditional “virtual console” user interface.
- Individual audio sources are visualized as sound sources in a room; the user can arrange the sources to create a mix with stereo width, and reverberative depth.
- NewMixer is currently a fully functional mixing tool, supporting saving, exporting, automation, plugin hosting and more.
- Documentation of NewMixer can be found on GitHub: <https://github.com/jatinchowdhury18/NewMixer>.
